TECHNICAL SKILLS

Mobile:
- Dart
- Flutter
- Swift
- iOS & Android (Release/Store)
- Ionic
- Cordova
- Capacitor
- Biometric Authentication
- Secure Storage
- Deeplinking
- Push Notifications
- Anti-Tampering
- SSL Pinning
- Jailbreak & Root Detection

Frontend:
- Javascript Vanilla
- Angular (v2-18)
- TypeScript
- JavaScript
- HTML5
- CSS/SCSS

Architecture & State Management:
- BLoC
- Clean Architecture
- Provider
- REST
- APIs

Tool & DevOps:
- Git
- Bitrise (CI/CD)
- Firebase
- AppStore Connect
- Google Play Console

Others:
- Bash
- Jira (Agile/Scrum)
- Figma
- SauceLabs

MATTEO MARIANI

Senior Mobile & Frontend Engineer

Professional Profile

Senior Mobile & Frontend Engineer with over 10 years of experience in designing and scaling Mobile and Web applications. Currently serving as a Team Lead at Globant, I guide cross-functional teams through critical technological migrations to Flutter for major insurance groups (Allianz). Acting as the primary technical point of contact for clients, I drive decisive, high-level strategies for both the architectural design of new applications and the continuous evolution (Change Requests) of live apps on the stores.

Expert in complex architectures (BLoC), Clean Code, and end-to-end Software Development Life Cycle (SDLC) management. Solid background working with institutional and banking clients (Banca d'Italia, Generali). Currently completing a degree in Computer Engineering to consolidate Software Architecture foundations.

Professional Experience

Globant Spa - ex Sysdata | Senior Mobile & FE Developer | 01.2025 – Present
* Tech Lead for the technological porting of Allianz's core applications from Ionic to Flutter.
* Designed BLoC-based Mobile architecture to ensure scalability and testability.
* Optimized UX/UI and integrated advanced security systems (Biometrics).
* Managed app releases via CI/CD pipelines using Firebase.

Sysdata Spa | Middle Mobile & FE Developer | 08.2023 – 12.2024
* Developed complex mobile applications "from scratch" for Allianz Bank, Generali, Cattolica, and Alleanza.
* Implemented Frontend solutions using Angular 18 and TypeScript.
* Provided technical consulting for complex data flow management and REST API integrations.

AGM Solutions | Software Engineer | 07.2022 – 08.2023
* Developed Web and Mobile applications for the Bank of Italy, Generali Italia, Cattolica, and Alleanza.
* Focused on accessibility, data security, and application performance.
* Collaborated within Agile teams to meet strict institutional deadlines.

WAY Srl | Mobile & FE Developer | 02.2020 – 06.2022
* Developed Mobile applications for corporate car-sharing fleet management (TIM, IREN gas).
* Developed UI components for corporate web portals and maintained existing systems.

Abintek | Junior Mobile Developer | 01.2016 - 01.2020
* Developed and maintained hybrid applications using Cordova, Vanilla JavaScript to monitor automotive metal components.
* Managed the initial product life cycle and application releases on the respective app stores.

Officine informatiche | Web Developer Intern | 2011 (6 months)
* Designed and developed two custom websites utilizing WordPress, HTML, CSS, and JavaScript.
* Gained foundational hands-on experience in frontend web development and Content Management Systems (CMS) during a school-work training program.

SOFT SKILLS

Mobile:
- Technical Architecture
- Secure Data Storage
- Data-at-Rest Encryption
- Product Development Issue Management
- IT Risk Management
- Quality Management
- Data Management
- Systems Integration
- Pipeline Development & Integration
- CI/CD with GitLab
- Microservices Management
- Mobile Testing
- Code Obfuscation
- Performance Optimization
- Certificate Pinning
- Application Design
- Root and Jailbreak Detection
- Biometric Systems Integration
- Project Guidelines Development
- Usability Guidelines Implementation
- Accessibility Guidelines Implementation
- iOS SwiftUI
- Android Views
- Application UX/UI Definition
- Apple App Store Management
- Apple Certificate Creation & Management
- Google Play Console Management
- Google Play Store Management

Frontend:
- Technical Architecture
- Secure Data Storage
- Data-at-Rest Encryption
- CI/CD with GitLab
- Microservices Management
- REST APIs
- Jenkins Integration
- Performance Optimization
- Usability Guidelines Implementation
- Accessibility Guidelines Implementation

Management:
- Technical Architecture Design
- Team Goal Management
- Development Issue Management
- IT Risk Management
- Quality Management
- Project Resource Management
- Data Management
- GitHub Actions
- Agile Methodology (Kanban/Scrum)
- Mentoring
- Client Negotiation
- Strategic Planning
- Decision-Making Processes
- Application Design
- Security Oversight
- Project Guidelines Development
- Team Building
- Team Member Evaluation

MATTEO MARIANI

Senior Mobile & Frontend Engineer

RELEVANT PROJECTS

* **Allianz Transition:** Full migration of an enterprise app with thousands of users, reducing load times by 40% using Flutter and refactoring the entire UX/UI.
* **Allianz Insurance:** Creation of new workflows and routes for mobile and front-end applications as part of a technology porting project and UI redesign.
* **Allianz Bank Magazine App:** Engineered an immersive, Flipboard-style tablet application featuring custom page-flip mechanics to emulate a digital newspaper for browsing corporate news.
* **Generali Italia Security Lead:** Led the management and resolution of all security-related issues for the Generali Italia Group's mobile and front-end applications.
* **Turin Municipality Drone Tracker:** Developed a real-time web platform to render perimeter and telemetry data from drones monitoring large land areas.
* **Financial Education (Banca d'Italia):** Development of a cross-platform app aimed at public outreach, with a focus on a simplified UX for a diverse target audience.
* **Automotive & Bluetooth:** Development "from scratch" of an enterprise application (Angular, Cordova) for managing internal car sharing for the vehicle fleets of large corporations (TIM, Iren Gas).
* **Bluetooth Custom Plugins:** Created custom plugins for Bluetooth-based management of car door locking/unlocking and real-time vehicle status information.
* **Bluetooth Real-Time Console:** Built a diagnostic console-style application designed to parse, visualize, and monitor real-time data streams received via Bluetooth connections.
* **High-Precision Measurement Monitor:** Developed an application (Cordova, Vanilla JavaScript) to monitor and visualize highly precise measurements calibrated to the thousandth captured by a mechanical measuring arm inspecting automotive metal components.

EDUCATION AND LANGUAGES

* Computer Engineering | University (In progress)
* Diploma in Computer Programming
* Languages:
  - Italian (Native)
  - English (B2 - Professional Level)
  - French (A2 - Educational Level)
